**Evaluation
Studies**

In

22

States

OUTCOMES: Reduced Child Maltreatment

OUTCOMES: Increased use of prenatal care

OUTCOMES: Healthier Children At Birth

OUTCOMES: Increased School Readiness

OUTCOMES: Increased Parent Child Interaction

OUTCOMES: Increased Access/Use of Primary Health Care

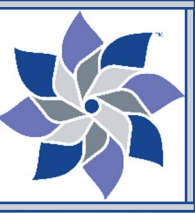

Relationships

The background of the slide is a photograph of a parent and a child in silhouette against a bright, cloudy sky. The child is being held up by the parent, and they appear to be in a playful interaction. The sky is filled with white, fluffy clouds against a blue background.

Hire The Best People

And sometimes, nurses!

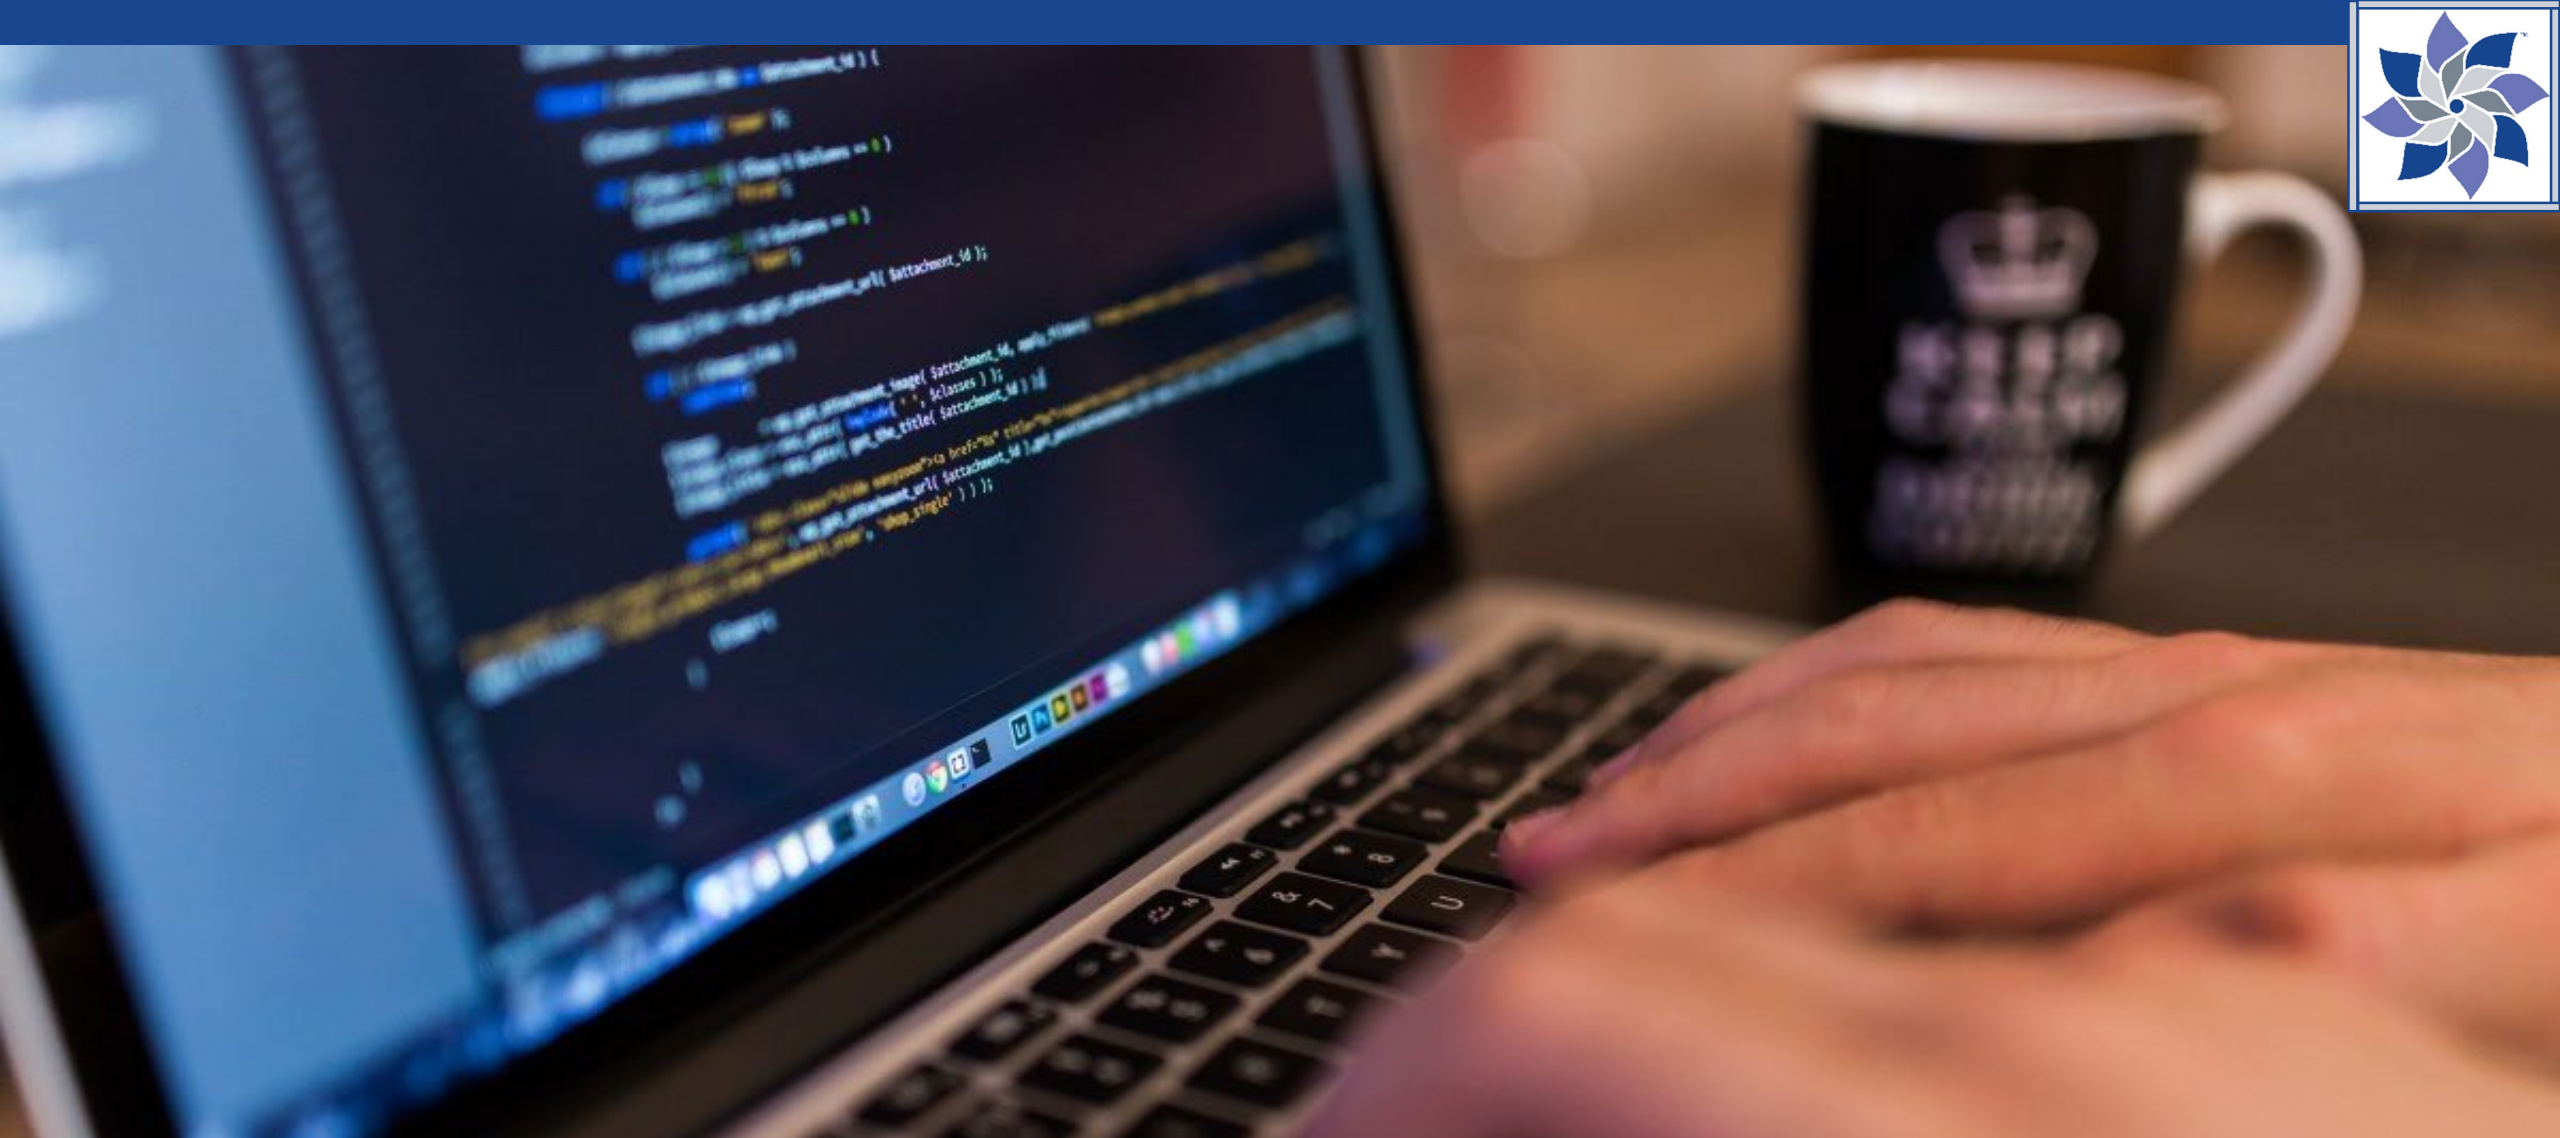

Choose the Right Materials

“If we want to build a program about a better connection between the family and the child, the program should be very connected also”.
